

Hansen-derived mining-polygon onset years (Ghana, Maus et al. footprint)

Forested-baseline polygons only ($\geq 10\%$ of area forested in 2000); NA = no loss detected by 20

Share of each Maus polygon forested in 2000 (baseline for the onset-year proxy)

Dashed line = 10% usability cutoff (MIN_FOREST_SHARE)

Hansen-derived onset year by Maus et al. mining polygon

Grey = no usable forested baseline in 2000, or no loss detected by 2025
